

CURRICULUM VITAE

Name	Dr.Wanida Tripanichkul
Title	Associate Professor
Office	Department of Anatomy, Faculty of Medicine, Sriankharinwirot university, Bangkok 10110, Thailand Telephone: 02-2602234 ext 4505
Home	765/26 Soi Phahol yothin I, Phahol yothin Road , Phayathai, Bangkok 10400, Thailand
E-mail:	wanidatr@swu.ac.th
Citizenship	THAI
Education	Ph.D. - Faculty of Medicine, Monash University, Australia D.V.M. - Faculty of Veterinary Medicine, Kasetsart University, Thailand
Teaching experience	- Microanatomy for medical, dental, optometry and nurse students - Gross Anatomy for medical, dental and nurse students - Neuroanatomy for medical and dental students
Memberships of professional societies	- Japan Neuroscience Society - Society for Neuroscience, USA
Publications	<u>Lists of international publications</u> - Estrogen increases striatal GDNF immunoreactivity with no effect on striatal FGF-2 immunoreactivity of MPTP-treated mice. Tripanichkul W , Jaroensuppaperch EO. J Med Assoc Thai. 2015 Oct;98 Suppl 9:S16-22. - Ameliorating effects of curcumin on 6-OHDA-induced dopaminergic denervation, glial response, and SOD1 reduction in the striatum of hemiparkinsonian mice. Tripanichkul W , Jaroensuppaperch EO. Eur Rev Med Pharmacol Sci. 2013 May;17(10):1360-8. - Curcumin protects nigrostriatal dopaminergic neurons and reduces glial activation in 6-hydroxydopamine hemiparkinsonian mice model. Tripanichkul W , Jaroensuppaperch EO. Int J Neurosci. 2012 May;122(5):263-70.

- Estrogen reduces BDNF level, but maintains dopaminergic cell density in the striatum of MPTP mouse model. **Tripanichkul W**, Gerdprasert O, Jaroensuppaperch EO. *Int J Neurosci*. 2010 Jul;120(7):489-95.
- Estrogen enhances the number of nigral dopaminergic neurons of adult male mice without affecting nigral neuroglial number and morphology. **Tripanichkul W**, Jaroensuppaperch EO, Finkelstein DI. *Neurosci Lett*. 2008 Apr 25;435(3):210-4.
- 17Beta-estradiol reduces nitrotyrosine immunoreactivity and increases SOD1 and SOD2 immunoreactivity in nigral neurons in male mice following MPTP insult. **Tripanichkul W**, Sripanichkulchai K, Duce JA, Finkelstein DI. *Brain Res*. 2007 Aug 20;1164:24-31.
- Estrogen down-regulates glial activation in male mice following 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine intoxication. **Tripanichkul W**, Sripanichkulchai K, Finkelstein DI. *Brain Res*. 2006 Apr 21;1084(1):28-37.
- Glial responses associated with dopaminergic striatal reinnervation following lesions of the rat substantia nigra. Stanic D, **Tripanichkul W**, Drago J, Finkelstein DI, Horne MK. *Brain Res*. 2004 Oct 8;1023(1):83-91.
- D2 Dopamine receptor blockade results in sprouting of DA axons in the intact animal but prevents sprouting following nigral lesions. **Tripanichkul W**, Stanic D, Drago J, Finkelstein DI, Horne MK. *Eur J Neurosci*. 2003 Mar;17(5):1033-45.
- The role of interleukin-1, interleukin-6, and glia in inducing growth of neuronal terminal arbors in mice. Parish CL, Finkelstein DI, **Tripanichkul W**, Satoskar AR, Drago J, Horne MK. *J Neurosci*. 2002 Sep 15;22(18):8034-41.
